

To whom it may concern: I want to fully express my distaste for the strong-arm bullying tactics being employed by the NAB and it's associated PAC's regarding XM radio. The reason XM and SIRIUS found a customer base was the distasteful bland programming that corporate megastations have forced down our throats for over a decade. I welcome the chance to have commercial free, locally specialized satellite radio content provided on a subscription basis. If the NAB, ClearChannel and other radio behemoths fear the competition from a superior product, I highly recommend they clean up their act and provide a quality product. You can't legislate consumer loyalty. To the state representatives in Washington, please remember - the special interests may pad your pockets, but we the voters can vote to send you home as a private citizen again. Please listen closely to your constituents and not only your the lobbyists. WE THE PEOPLE demand free and fair competition in the arena of satellite radio content. We expect our legislators to represent us accordingly in these matters.
